ARNAUD GEYSSELS

Conservation Biologist & Biostatistician

CONTACT

arnaud.geyssels@gmail.com
+32 472 98 22 84
Haute-Corse, France

AREAS OF EXPERTISE

- Biodiversity & ecosystem knowledge
- Population genetics
- Ecophysiology, evolutionary biology
- Data analysis & modeling
- Remote sensing & satellite imagery
- Digital tool & application development

TECHNICAL SKILLS

Ecology & Fieldwork

Standardized protocols, experimental design, field team management, naturalist surveys

Data Analysis

R, multivariate statistics, statistical & cartographic modeling

GIS & Telemetry

QGIS, PyQGIS, QField, spatial occupancy analysis, telemetry (NGAnalyzer)

Development

Cursor, React, Node.js, HTML/CSS

Databases

PostgreSQL, SQL, Supabase, SINP format (ecology)

CERTIFICATIONS

Non-invasive Data Collection — Amphibians

French Herpetological Society, 2025

Data Analysis — Ecology & Biodiversity (Level 3/3)

EPHE, Paris, 2024

Handling of Vipera sp.

CNRS — CEBC, 2021

LANGUAGES

French — native language
English — professional (B2)
Dutch — basic (A2)
Spanish — basic (A2)

PROFILE

Conservation biologist specializing in herpetology, working at the intersection of field expertise, data analysis, and the design of digital and mapping tools. My work addresses environmental impacts across multiple scales, from genetic and ecophysiological questions at the species level to global change, drawing on field data, satellite data, and appropriate statistical methods. In parallel, I design and manage a naturalist database and develop applications for collecting, analyzing, and visualizing data to support ecological monitoring.

PROFESSIONAL EXPERIENCE

MARCH 2023 — PRESENT

Biodiversity Project Officer

Conservatoire d'espaces naturels de Corse

Applied Research in Herpetology

- Genetic structure of *Bufotes viridis balearicus* in Corsica (with MNHN, SHF)
- Development of acoustic monitoring methods for amphibian fauna (BioPhonia project)
- Telemetry monitoring and spatial occupancy modeling
- Study of the impact of environmental gradients on morphometric traits of *Bufotes viridis balearicus* in Corsica (with CNRS)

Project Management & Scientific Outreach

- Conservation of endemic island flora (National Action Plan for *Anchusa crispa*, among others)
- Project design, budgeting, and coordination (funding calls, Communal Biodiversity Atlas)
- Management of naturalist databases (R, PostgreSQL, Supabase)
- Mapping and spatial analysis (QGIS, QField)
- Delivery of technical training (evolutionary biology, Reptile/Amphibian Population Monitoring Program)

2023 — PRESENT

Biostatistics Instructor & Reviewer

Independent activity — online courses

- Teaching statistics, genetics, and ecology
- Design of digital learning tools

2021

Teaching Assistant in Statistics

Université Catholique de Louvain (Belgium)

- Taught statistical analysis and data management using R (LBIO1282)
- Supervised practical sessions in biological data analysis

RESEARCH INTERNSHIPS

FEB. — JUL. 2022

Ecophysiology in Amphibians

Doñana Biological Station (CSIC), Seville

Study of environmental influences (water stress, predation, parasitism) on morphology, histology, and corticosterone levels in amphibians. Introduction to microscopic imaging and hormone extraction techniques.

JUL. — AUG 2021

Thesis — Hydro-thermoregulation in Vipera sp.

Centre for Biological Studies of Chizé (CNRS)

Analysis of the effects of water and heat stress on the morphology, behavior, and physiology of vipers. Techniques included ultrasound imaging, metabolic rate measurement, water-loss quantification, and handling of protected species.

EDUCATION

2019 — 2022

Master's Degree in Organismal Biology and Ecology — Cum Laude

Université Catholique de Louvain (Belgium) — including bridging year 2019–2020

Ecology, statistical analysis, GIS, molecular biology, genomics, ecotoxicology, and conservation biology concepts.

2016 — 2019

Bachelor's Degree in Neuroscience, Neurophysiology, and Psychology

Université Catholique de Louvain (Belgium)

Neuroscience, neurophysiology, cognitive and social psychology, research methods, and statistics.

Additional publications in preparation.

Press & Popular Science Articles

- Corse-Matin — "In Corsica, when grass snakes fall madly in love..." (2026)
- Revue Espèces — Conservation Special Issue No. 1 — "The Genetic Secrets of the Green Toad"

TOOLS & APPLICATIONS DEVELOPED

Web Mapping Interface

- Decision-support tool: visualization of the distribution of endemic Corsican plant species – link.
- Visualization interface for the CEN Corse naturalist database

Mobile Applications

- CEN Corse App: naturalist data entry connected to the Conservancy's database, access to digital resources, and presentation of activities (available on the Play Store)

Other tools in preparation.
